Wir bescheinigen, daß der/die vorgenannte(n) Abguß/Abgüsse einer Oberflächenrißprüfung mittels Farbeindringverfahren unterzogen wurde(n). Die Bewertung erfolgte nach MSS-SP 93/ANSI B 16.34 Annex D. Unzulässige Anzeigen wurden nicht festgestellt.

Die Anschnitt- und Speisertechnik ist auf eine Qualität entsprechend A3,B3,C3 ausgelegt.

Der/die Abguß/Abgüsse wurden einer visuellen Kontrolle nach MSS-SP 55 unterzogen. Keine Beanstandungen.

We herewith testify that the casting(s) has/have been submitted to a liquid penetrant inspection. The evaluation was made acc. to MSS-SP 93/ANSI B 16.34 Annex D. There have been detected no inadmissible defects.

The riser technique has a quality which conforms to A3,B3,C3.

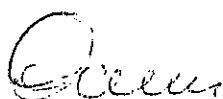

The casting(s) has/have been submitted to a visual inspection acc. to MSS-SP 55. No objection.

EC-TYPE-EXAMINATION CERTIFICATE

(Translation)

(2) Equipment and Protective Systems Intended for Use in Potentially Explosive Atmospheres - **Directive 94/9/EC**

(3) EC-type-examination Certificate Number:

PTB 01 ATEX 1016

(4) Equipment: Terminal box, type 8146/1...-.. and type 8146/2...-..

(5) Manufacturer: R. STAHL Schaltgeräte GmbH

(6) Address: Am Bahnhof 30, 74638 Waldenburg (Württ.), Germany

(7) This equipment and any acceptable variation thereto are specified in the schedule to this certificate and the documents therein referred to.

(8) The Physikalisch-Technische Bundesanstalt, notified body No. 0102 in accordance with Article 9 of the Council Directive 94/9/EC of 23 March 1994, certifies that this equipment has been found to comply with the Essential Health and Safety Requirements relating to the design and construction of equipment and protective systems intended for use in potentially explosive atmospheres, given in Annex II to the Directive.

The examination and test results are recorded in the confidential report PTB Ex 01-11019.

(9) Compliance with the Essential Health and Safety Requirements has been assured by compliance with:

EN 50014:1997 + A1 + A2

EN 50018:1994

EN 50019:1994

EN 50020:1994

EN 50028:1987

(10) If the sign "X" is placed after the certificate number, it indicates that the equipment is subject to special conditions for safe use specified in the schedule to this certificate.

(11) This EC-type-examination Certificate relates only to the design and construction of the specified equipment in accordance with Directive 94/9/EC. Further requirements of this Directive apply to the manufacture and supply of this equipment.

(12) The marking of the equipment shall include the following:

Ex II 2 G EEx edm ia/ib [ia] IIC/IIB/IIA T6, T5 or T4

Zertifizierungsstelle Explosionsschutz

Braunschweig, June 13, 2001

By order:

Dr.-Ing. U. Klausmeyer
Regierungsdirektor

sheet 1/3

EC-type-examination Certificates without signature and official stamp shall not be valid. The certificates may be circulated only without alteration. Extracts or alterations are subject to approval by the Physikalisch-Technische Bundesanstalt. In case of dispute, the German text shall prevail.

SCHEDULE

(13)

(14) **EC-TYPE-EXAMINATION CERTIFICATE PTB 01 ATEX 1016**

(15) Description of equipment

The terminal box of types 8146/1...-.. and 8146/2...-.. is a polyester-resin housing designed to type of protection increased safety "e". It is used to house terminals for intrinsically safe and non-intrinsically safe circuits and may optionally be provided with disconnect terminals and fuses. The box area intended for intrinsically safe circuits will be marked by a special colour (e.g. light-blue). Connection will be made by means of explosion-proof cable entries.

The enclosure as well as any installed and attached components have been tested and certified under a separate test certificate.

Technical data

| | | | |
|----------------------|-------------|------|-----------------|
| Rated voltage* | up to | 1100 | V |
| Rated current* | max. | 500 | A |
| Rated cross section* | max. | 300 | mm ² |

*) depending on type of terminal and explosion-proof components used

| | |
|---------------------|---|
| Ambient temperature | depending on temperature class and sealing used |
| | -20°C to +40°C, T6 |
| | -40°C to +40°C, T6 |
| | -20°C to +55°C, T5 |
| | -40°C to +55°C, T5 |

The ratings specified are maximum values, actual values will be subject to the electrical equipment used from case to case. Depending on the system conditions, the mode of operation, the utilisation category, etc., the manufacturer will define the definitive ratings which will be within the range of these limiting values and will comply with the relevant standards.

The composition of the protection symbol will be based on the types of protection of the components actually used.

(16) Test report PTB Ex 01-11019

(17) Special conditions for safe use

None;

Notes for installation and use

For the maximum number of conductors, which for each size of enclosure is determined by the cross section and the admissible continuous current, reference is made to the specification sheets.

Equipment of the type of protection Intrinsic Safety "i" shall be installed in such a way that the clearances and creepage distances between intrinsically safe and non-intrinsically safe circuits as set forth in 60079-14 are duly accounted for.

If the clearance requirements for the connectors as specified in EN 50020 cannot be safeguarded with the system installation and layout, wiring that meets the quality criteria Increased Safety "e" shall be used, or the wiring shall be of the fail-safe type.

When using more than one intrinsically safe circuit, the rules and regulations for interconnection shall duly be observed.

This EC type-examination certificate as well as any future supplements thereto shall at the same time be regarded as supplements to Certificate of Conformity PTB No. Ex-90.C.3145.

(18) Essential health and safety requirements

The tests and the favourable results these have produced reveal that the terminal box of types 8146/1...-.. and 8146/2...-.. meets the requirements of directive 94/9/EC as well as those of the standards quoted on the cover sheet.

Zertifizierungsstelle Explosionsschutz

Braunschweig, June 13, 2001

By order

Dr.-Ing. U. Klausmeyer
Regierungsdirektor

1st SUPPLEMENT

according to Directive 94/9/EC Annex III.6

to EC-TYPE-EXAMINATION CERTIFICATE PTB 01 ATEX 1016

(Translation)

Equipment: Terminal box, type 8146/1...-.. and type 8146/2...-..

Marking:  II 2 G EEx edm ia/ib [ia] IIC/IIB/IIA T6, T5 or T4

Manufacturer: R. STAHL Schaltgeräte GmbH

Address: Am Bahnhof 30
D-74638 Waldenburg (Württ.), Germany

Description of supplements and modifications

The terminal box, type 8146/1...-.., may also be fitted with bolt-type screw terminals connected with busbars.

Technical data

| | | |
|----------------------------------|-------|---|
| Rated voltage | up to | 750 V |
| Rated current..... | max. | 315 A for T6 |
| | | 400 A for T5 |
| Rated short-circuit current..... | max. | 70 kA |
| Rated cross section | max. | 185 mm ² , connection with cable lug |

Notes for manufacture and operation

The line-side fuse or protective device shall be selected so as to provide for safe interruption of the max. rated current, the max. rated short-circuit current, and the max. rated short-time current (1 s).

The supplement for the EC type-examination certificate shall at the same time be regarded as a supplement for Certificate of Conformity PTB No. Ex-94.C.3147.

Test report: PTB Ex 01-11145

Zertifizierungsstelle Explosionsschutz

Braunschweig, January 30, 2002

By order:

Dr.-Ing. U. Klausmeyer
Regierungsdirektor

Sheet 1/1

EC-type-examination Certificates without signature and official stamp shall not be valid. The certificates may be circulated only without alteration. Extracts or alterations are subject to approval by the Physikalisch-Technische Bundesanstalt. In case of dispute, the German text shall prevail.

SUPPLEMENTARY SHEET 01

to EC TYPE-EXAMINATION CERTIFICATE PTB 01 ATEX 1016

Fitting of terminal boxes Type 8146/1031

Max. number of conductors ¹⁾ depending on cross section and the permissible continuous current:

| current / A | cross section / mm ² | | | |
|---|---------------------------------|-----|-----|----|
| | 1,5 | 2,5 | 4 | |
| 3 | | | | 2) |
| 6 | | | | |
| 10 | 42 | | | |
| 16 | 14 | 28 | 108 | 4) |
| 20 | 6 | 16 | 31 | |
| 25 | | 7 | 17 | |
| 35 | | | 5 | |
| 50 | | | | 3) |
| | 14 | 14 | 14 | |
| max. number of terminals depending of the above mentioned enclosure size and the cross section resp. max. permissible conductor cross section of the built-in terminals | | | | |

Notes

- 1) Each incoming conductor and each internal connection wire is counted as a conductor. Bridges and earthing conductors are not counted.
- 2) additional conductors optional
- 3) to be specified by the manufacturer (including temperature rise test)
- 4) When applying the values of this table simultaneous factors or load factors to IEC 439 may be considered. Mixed equipment with circuits of different cross sections and currents is possible if the various values of the table are applied proportionally:

| | | | | |
|-----------------------|---------------------------------|-------------|-------------------------|----------------|
| Example: (general) | cross section / mm ² | current / A | number of conductors | utilization |
| | 2,5 | 16 | 10 (of 30) | = 33 % |
| | 16 | 50 | 12 (of 48) | = 25 % |
| | 25 | 63 | 36 (of 90) | = 40 % |
| | | | total | = 98 % < 100 % |

SUPPLEMENTARY SHEET 02

to EC TYPE-EXAMINATION CERTIFICATE PTB 01 ATEX 1016

Fitting of terminal boxes Type 8146/1041

Max. number of conductors ¹⁾ depending on cross section and the permissible continuous current:

| current / A | cross section / mm ² | | | | | | |
|-------------|---|-----|-----|----|----|----|----|
| | 1,5 | 2,5 | 4 | 6 | 10 | 16 | |
| 3 | | | | | | | 2) |
| 6 | | | | | | | |
| 10 | 44 | | | | | | |
| 16 | 15 | 29 | 114 | | | | |
| 20 | 6 | 17 | 33 | | | | |
| 25 | | 8 | 18 | 36 | | | |
| 35 | | | 5 | 14 | 35 | | 4) |
| 50 | | | | 2 | 11 | 29 | |
| 63 | | | | | 3 | 13 | |
| 80 | | | | | | 5 | |
| 100 | | | | | | | 3) |
| | 28 | 28 | 28 | 10 | 10 | 8 | |
| | max. number of terminals depending of the above mentioned enclosure size and the cross section resp. max. permissible conductor cross section of the built-in terminals | | | | | | |

Notes

- 1) Each incoming conductor and each internal connection wire is counted as a conductor. Bridges and earthing conductors are not counted.
- 2) additional conductors optional
- 3) to be specified by the manufacturer (including temperature rise test)
- 4) When applying the values of this table simultaneous factors or load factors to IEC 439 may be considered. Mixed equipment with circuits of different cross sections and currents is possible if the various values of the table are applied proportionally:

| Example: (general) | cross section / mm ² | current / A | number of conductors | utilization |
|-----------------------|---------------------------------|-------------|-------------------------|----------------|
| | 2,5 | 16 | 10 (of 30) | = 33 % |
| | 16 | 50 | 12 (of 48) | = 25 % |
| | 25 | 63 | 36 (of 90) | = 40 % |
| | | | total | = 98 % < 100 % |

SUPPLEMENTARY SHEET 03

to EC TYPE-EXAMINATION CERTIFICATE PTB 01 ATEX 1016

Fitting of terminal boxes Type 8146/1241

Max. number of conductors ¹⁾ depending on cross section and the permissible continuous current:

| current / A | cross section / mm ² | | | | | | | | |

| | 25 | 63 | 36 (of 90) | = 40 % |
| | | | total | = 98 % < 100 % |

SUPPLEMENTARY SHEET 14

to EC TYPE-EXAMINATION CERTIFICATE PTB 01 ATEX 1016

Fitting of terminal boxes Type 8146/1082

Max. number of conductors ¹⁾ depending on cross section and the permissible continuous current:

| current / A | cross section / mm ² | | | | | | | | | | |
|---|---------------------------------|-----|-----|-----|----|----|----|-----|----|----|----|
| | 1,5 | 2,5 | 4 | 6 | 10 | 16 | 25 | 35 | 50 | 70 | |
| 3 | | | | | | | | | | | 2) |
| 6 | | | | | | | | | | | |
| 10 | 86 | | | | | | | | | | |
| 16 | 29 | 57 | 221 | | | | | | | | |
| 20 | 12 | 33 | 64 | | | | | | | | |
| 25 | | 15 | 36 | 70 | | | | | | | |
| 35 | | | 10 | 27 | 68 | | | | | | |
| 50 | | | | 4 | 22 | 56 | | | | | |
| 63 | | | | | 7 | 26 | 93 | | | | |
| 80 | | | | | | 10 | 29 | 104 | | | |
| 100 | | | | | | | 12 | 27 | | | |
| 125 | | | | | | | | 11 | 28 | | |
| 160 | | | | | | | | | 9 | 24 | |
| 200 | | | | | | | | | | 8 | 4) |
| 225 | | | | | | | | | | 3 | |
| 250 | | | | | | | | | | | |
| | 312 | 312 | 208 | 117 | 76 | 60 | 50 | 20 | 14 | 14 | 3) |
| max. number of terminals depending of the above mentioned enclosure size and the cross section resp. max. permissible conductor cross section of the built-in terminals | | | | | | | | | | | |

Notes

- Each incoming conductor and each internal connection wire is counted as a conductor. Bridges and earthing conductors are not counted.
- additional conductors optional
- to be specified by the manufacturer (including temperature rise test)
- When applying the values of this table simultaneous factors or load factors to IEC 439 may be considered. Mixed equipment with circuits of different cross sections and currents is possible if the various values of the table are applied proportionally:

| Example: (general) | cross section / mm ² | current / A | number of conductors | utilization |
|-----------------------|---------------------------------|-------------|-------------------------|----------------|
| | 2,5 | 16 | 10 (of 30) | = 33 % |
| | 16 | 50 | 12 (of 48) | = 25 % |
| | 25 | 63 | 36 (of 90) | = 40 % |
| | | | total | = 98 % < 100 % |

| | | | | | | | | | | | | | | | | | 3) |
| | 676 | 676 | 468 | 273 | 190 | 128 | 106 | 60 | 29 | 29 | 8 | 8 | 6 | 6 | 6 | 6 | |
| max. number of terminals depending of the above mentioned enclosure size and the cross section resp. max. permissible conductor cross section of the built-in terminals | | | | | | | | | | | | | | | | | |

Notes

- 1) Each incoming conductor and each internal connection wire is counted as a conductor.
Bridges and earthing conductors are not counted.
- 2) additional conductors optional
- 3) to be specified by the manufacturer (including temperature rise test)
- 4) When applying the values of this table simultaneous factors or load factors to IEC 439 may be considered. Mixed equipment with circuits of different cross sections and currents is possible if the various values of the table are applied proportionally:

| Example: (general) | cross section / mm ² | current / A | number of conductors | utilization |
|-----------------------|---------------------------------|-------------|-------------------------|----------------|
| | 2,5 | 16 | 10 (of 30) | = 33 % |
| | 16 | 50 | 12 (of 48) | = 25 % |
| | 25 | 63 | 36 (of 90) | = 40 % |
| | | | total | = 98 % < 100 % |

EC-TYPE-EXAMINATION CERTIFICATE

(Translation)

- (2) Equipment and Protective Systems Intended for Use in Potentially Explosive Atmospheres - Directive 94/9/EC
- (3) EC-type-examination Certificate Number:

PTB 00 ATEX 2049 X

- (4) Equipment: SN-sensors, types NJ... and SJ...
- (5) Manufacturer: Pepperl + Fuchs GmbH
- (6) Address: D-68307 Mannheim
- (7) This equipment and any acceptable variation thereto are specified in the schedule to this certificate and the documents therein referred to.
- (8) The Physikalisch-Technische Bundesanstalt, notified body No. 0102 in accordance with Article 9 of the Council Directive 94/9/EC of 23 March 1994, certifies that this equipment has been found to comply with the Essential Health and Safety Requirements relating to the design and construction of equipment and protective systems intended for use in potentially explosive atmospheres, given in Annex II to the Directive.
- The examination and test results are recorded in the confidential report PTB Ex 00-29268.
- (9) Compliance with the Essential Health and Safety Requirements has been assured by compliance with:
- EN 50014:1997** **EN 50020:1994**
- (10) If the sign "X" is placed after the certificate number, it indicates that the equipment is subject to special conditions for safe use specified in the schedule to this certificate.
- (11) This EC-type-examination Certificate relates only to the design and construction of the specified equipment in accordance with Directive 94/9/EC. Further requirements of this Directive apply to the manufacture and supply of this equipment.
- (12) The marking of the equipment shall include the following:

II 2 G EEx ia IIC T6

Zertifizierungsstelle Explosionsschutz

By order:

Dr.-Ing. U. Johannsmeyer
Regierungsdirektor

Braunschweig, October 05, 2000

sheet 1/4

EC-type-examination Certificates without signature and official stamp shall not be valid. The certificates may be circulated only without alteration. Extracts or alterations are subject to approval by the Physikalisch-Technische Bundesanstalt. In case of dispute, the German text shall prevail.

SCHEDULE

(13)

(14) EC-TYPE-EXAMINATION CERTIFICATE PTB 00 ATEX 2049 X

(15) Description of equipment

The SN-sensors, types NJ... and SJ... are used to convert displacements into electrical signals.

The SN-sensors, types NJ... and SJ... may be operated with intrinsically safe circuits certified for categories and explosion groups [EEx ia] IIC or IIB resp. [EEx ib] IIC or IIB. The category as well as the explosion group of the SN-sensors depends on the connected supplying intrinsically safe circuit.

Electrical data

Evaluation and
supply circuit..... type of protection Intrinsic Safety EEx ia IIC/IIB
resp. EEx ib IIC/IIB
only for connection to certified intrinsically safe circuits
maximum values:

| type 1 | type 2 | type 3 | type 4 |
|-----------------------|-----------------------|------------------------|------------------------|
| $U_i = 16 \text{ V}$ | $U_i = 16 \text{ V}$ | $U_i = 16 \text{ V}$ | $U_i = 16 \text{ V}$ |
| $I_i = 25 \text{ mA}$ | $I_i = 25 \text{ mA}$ | $I_i = 52 \text{ mA}$ | $I_i = 76 \text{ mA}$ |
| $P_i = 34 \text{ mW}$ | $P_i = 64 \text{ mW}$ | $P_i = 169 \text{ mW}$ | $P_i = 242 \text{ mW}$ |

The assignment of the type of the connected circuit to the maximum permissible ambient temperature and the temperature class as well as the effective internal reactances for the individual types of SN-sensors is shown in the following table:

(16) Test report PTB Ex 00-29268

(17) Special conditions for safe use

1. For the application within a temperature range of -60 °C to -20 °C the SN-sensors, types NJ... and SJ... must be protected against damage due to impact by mounting into an additional housing.
2. The connection facilities of the SN-sensors, types NJ... and SJ... shall be installed as such that at least a degree of protection of IP20 according to IEC-publication 60529:1989 is met.
3. The assignment of the type of the connected circuit to the maximum permissible ambient temperature and the temperature class as well as the effective internal reactances for the individual types of SN-sensors is shown in the table given under item (15) of this EC-type-examination certificate.

4. With the application in group IIC inadmissible electrostatic charge of the plastic housing has to be avoided for following types of SN-sensors (warning label on the device):

NJ 40-FP-SN...

5. Inadmissible electrostatic charge of parts of the metal housing has to be avoided for the following types of SN-sensors. Dangerous electrostatic charges of parts of the metal housing can be avoided by grounding of these parts whereas very small parts of the metal housing (e.g. screws) don't need to be grounded:

NJ 2-11-SN-G...

NJ 6-22-SN-G...

NJ 6S1+U3+N...

NJ 6S1+U4+N...

NJ 15S+U3+N...

NJ 15S+U4+N...

NJ 20S+U3+N...

NJ 20S+U4+N...

NJ 40-FP-SN-P3...

NJ 40-FP-SN-P4...

(18) Essential health and safety requirements

Met by the standards mentioned above

Zertifizierungsstelle Explosionsschutz

By order:

Dr.-Ing. U. Johannsmeyer
Regierungsdirektor

Braunschweig, October 05, 2000

1. E R G Ä N Z U N G

gemäß Richtlinie 94/9/EG Anhang III Ziffer 6

zur EG-Baumusterprüfbescheinigung PTB 00 ATEX 2038

Gerät: Stellungsregler Typ 3780 – 1...

Kennzeichnung:  II 2 G EEx ia IIC T6

Hersteller: Samson AG Mess- und Regeltechnik

Anschrift: Weismüllerstr. 3, D-60314 Frankfurt

Beschreibung der Ergänzungen und Änderungen

Der Stellungsregler Typ 3780 – 1... darf künftig entsprechend den im zugehörigen Prüfbericht aufgeführten Prüfungsunterlagen gefertigt werden.

Die Ankoppelschaltung, die Schaltung der Logikplatine und die Schaltung für den Wegaufnehmer wurden auf Grund geänderter EMV-Grenzwerte modifiziert.

Die Änderungen betreffen den inneren und äußeren Aufbau.

Die elektrischen Daten ändern sich wie folgt:

Elektrische Daten

Signalstromkreis in Zündschutzart Eigensicherheit EEx ia IIC
(Klemmen 11/12) nur zum Anschluss an einen bescheinigten eigensicheren Stromkreis

Höchstwerte:

$U_i = 28 \text{ V}$

$I_i = 115 \text{ mA}$

$P_i = 1 \text{ W}$

$C_i = 5,3 \text{ nF}$

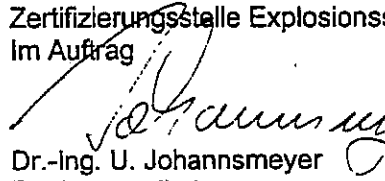

$L_i = 45 \text{ µH}$

Alle übrigen Angaben gelten unverändert auch für diese 1. Ergänzung.

TRANSLATION
ADDENDUM No.: 1

**in compliance with Directive 94/9/EC Annex III Clause 6
to the EC Type Examination Certificate PTB 98 ATEX 2038**

Equipment: Model 3780-1... Positioner

Marking:  II 2 G EEx ia IIC T6

Manufacturer: SAMSON AG

Address: Weismüllerstr. 3, D-60314 Frankfurt, Germany

Description of the additions and modifications

In future the Model 3780-1... Positioner may be manufactured in compliance with the certification documents identified in the associated test report.

The coupling circuit, the wiring of the logic board and the wiring of the displacement transducer were modified because of changed EMC limit values.

The modifications relate to the design and construction.

EC Type Examination Certificates without signature and seal are invalid.
This EC Type Examination Certificate may only be reproduced in its entirety and without any changes, schedule included.
Extracts or changes shall require the prior approval of the Physikalisch-Technische Bundesanstalt.

Physikalisch-Technische Bundesanstalt., Bundesallee 100, D-38116 Braunschweig

The electrical data are changed as follows:

Electrical data:

Signal circuit
(terminals 11/12)

Type of protection. Intrinsic safety EEx ia IIC
only for connection to a certified
intrinsically safe circuit

Maximum values:

$U_i = 28 \text{ V}$
 $I_i = 115 \text{ mA}$
 $P_i = 1 \text{ W}$

$C_i = 5.3 \text{ nF}$, $L_i = 45 \text{ }\mu\text{H}$

All the other data apply without change also to this Addendum No. 1

Test report: **PTB Ex 00-20260**
